As a performing artist with 30 years experience, I have a working knowledge of what is expected of animal actors during live stage productions, commercials, motion pictures and still photography. Having spent time as a physical comedienne and acrobat with several national and international circuses, I also have contacts with some of the most highly respected animal trainers in the circus industry.

My own dogs have performed in theatrical productions including the Broadway stage. They have appeared in commercials, music videos, film, TV and print. My eldest dog has the distinction of being the first "MoCap" dog for Spectrum Productions in Los Angeles, CA.
